SUMMARY

Cybersecurity student who learns by running real systems: a self-hosted Wazuh SIEM, a Proxmox VE home lab, and a live Google Workspace domain. Front-line help desk experience supporting students, faculty and staff.

CERTIFICATIONS

- Google Cloud Cybersecurity Certificate (completed)
- CompTIA A+ (220-1201 / 220-1202), in progress
- CompTIA Security+, in progress

EXPERIENCE

IT Help Desk Assistant, Miami University Regionals

Feb – May 2025

- Front-line, in-person support for students, faculty and staff.
- Password resets and account recovery.
- Set up classroom and lab computers and peripherals.

PROJECTS

Wazuh SIEM lab

Wazuh 4.14 · Ubuntu 24.04 · Node/Express · React

- All-in-one Wazuh with agents on the hypervisor and SIEM host; Express proxy feeds alerts to local LLMs to draft incident-response write-ups; React alert dashboard.

Proxmox VE 9 home lab

LXC · Docker · Pi-hole · Tailscale

- VMs and LXC on a repurposed laptop; Pi-hole with Cloudflare upstreams; LVM-thin snapshots; TOTP login; Tailscale remote access; RTX 3060 local LLM. Diagnosed static-IP and USB NIC link faults.

Trail Window

JavaScript · Cloudflare Workers · Playwright

- Weather-window planner with GPX parsing; AI briefing behind a hardened Worker (server-side key, CORS allowlist, validation, rate limiting).

dragonsmithers.com infrastructure

Google Workspace · DNS · GitHub Pages

- Administer the Workspace tenant (users, 2-Step Verification, DKIM), DNS records including SPF, and this GitHub Pages site on a verified custom domain.

EDUCATION

A.S. Cybersecurity, University of Cincinnati Blue Ash

Expected 2028

Coursework, Miami University Regionals

SKILLS

Wazuh, log analysis, SPF/DKIM/DMARC, TOTP 2FA · Ubuntu, Debian, Windows Server, Active Directory, Proxmox VE, Docker, LXC, Google Workspace Admin · DNS, Pi-hole, Tailscale, static addressing, firewall rules · JavaScript, TypeScript, Bash, React, Node.js, SQL, Git
